

Research Activity Report
Supported by “Leading Graduate Program in Primatology and Wildlife Science”
 (Please be sure to submit this report after the trip that supported by PWS.)

2014. 6, 15

Affiliation/Position	Wildlife Research Center/M1
Name	Kei Matsushima

1. Country/location of visit
Japan, Kagoshima, Yakushima
2. Research project
Yakushima Field Science Course
3. Date (departing from/returning to Japan)
2014. 5.18. – 2014. 5.26 (9 days)
4. Main host researcher and affiliation
Dr. Shiro Kohshima, Professor at Wildlife Research Center
5. Progress and results of your research/activity (You can attach extra pages if needed)
Please insert one or more pictures (to be publicly released). Below each picture, please provide a brief description.
Our purpose of Yakushima Field Training Course is to learn the basic of field work and analysis of the data. On the stay, 4days for survey and data arrangement, and 1day for presentation. I belonged to Monkey team and surveyed about monkeys' behaviour and feedings. We collected feces for wash analysis and DNA analysis which is for genome training course after this training course. Collected data was very little, so we cannot consider deeply, but some tendency we found. Monkeys take very long time for feeding, for example.
