

Research Activity Report
Supported by “Leading Graduate Program in Primatology and Wildlife Science”
 (Please be sure to submit this report after the trip that supported by PWS.)

2016. 6, 21	
Affiliation/Position	Primate Research Institute/M1
Name	Gao Jie

1. Country/location of visit
Kyoto
2. Research project
Psychology Meeting of Kyoto University
3. Date (departing from/returning to Japan)
2016. 6. 1 (1 day)
4. Main host researcher and affiliation
Unit for Advanced Studies of the Human Mind of Kyoto University
5. Progress and results of your research/activity (You can attach extra pages if needed)
Please insert one or more pictures (to be publicly released). Below each picture, please provide a brief description.
<p>I attended the psychology meeting held by Unit for Advanced Studies of the Human Mind of Kyoto University in Yoshida Campus on June 11. I joined the poster session and had a poster presentation about my study progress.</p> <p>Compared to the presentation I gave last time in the unit meeting, more chimpanzees have passed my task, and some of them started a generalization task. Many people came to my poster and provided valuable advice. I had discussions with the audience about many aspects of my study, including the reason behind the chimpanzees’ performances in the current task, the future direction of the game playing in chimpanzees, and another research topic that would possibly answer one of the interesting questions found in their performances in the generalization task. I also met people I got to know from last time’s meeting. Unlike other activities I joined before where there were more PRI people I’m familiar with, in this unit meeting there are researchers focusing on psychology from different departments of Kyoto University, which makes it a great opportunity to discuss and communicate about various studies.</p>
