We aimed to understand the roles of zoos and museums and what to do in each section of the zoo. We also aimed to learn how to tell people with little professional knowledge the result of studies on wild animals.</p> <p>I understood the roles of zoos and museums and what to do in each section of JMC. As my goals of PWS program, I’m considering a conservation specialist firstly, and a curator of zoos or museums secondly. Whether I choose the former or the latter, I have to tell those who don’t have professional knowledge my research results. Through this course, I got to want to use JMC as a practical place for such communication.</p>
