<p>I visited ANC productions, which Prof. Nakamura is working for. My aim was collecting video which I use for my experiment. I need adult or infant chimpanzee video. I'm satisfied with the result of getting many video. However, I worked for 7 hours, but I looked through only half of them.</p> <p>Not only collecting the video, but also I got many ideas for my study. That was good thing. For example, I feel my eyes were caught by infant chimpanzee when I watched several chimpanzees even when I couldn't see their faces. Of course, part of the reasons was because I aimed to collect infant video. However, I thought I can use this phenomenon for my future experiment.</p> <p>Chatting with Prof. Nakamura also gave lots of insight. This trip was just one day but it was very fruitful.</p>
