

Research Activity Report
Supported by “Leading Graduate Program in Primatology and Wildlife Science”
 (Please be sure to submit this report after the trip that supported by PWS.)

	2017. 09. 03
Affiliation/Position	Wildlife Research Center/D3
Name	Kasumi Sakakibara

1. Country/location of visit	
Tokyo, Japan	
2. Research project	
Oral presentation at KOUDOU2017	
3. Date (departing from/returning to Japan)	
2017. 08. 29-09. 01 (4 day)	
4. Main host researcher and affiliation	
-	
5. Progress and results of your research/activity (You can attach extra pages if needed)	
Please insert one or more pictures (to be publicly released). Below each picture, please provide a brief description.	
	<p>In 30th August to 1st September, the behaviour conference, KOUDOU 2017, was hold on in Tokyo University, Japan. I presented it that title was “Investigation of sunameri <i>Neophocaena phocaenoides</i>, observed using by drone.” in the video session, 13:45-14:00 in 1st Sep.. KOUDOU 2017 was hold by Japan Ethological Society, the Japanese Society for Animal Psychology, Japanese society for applied animal behavior, Japanese Society for Behavioral Neuroendocrinology, Animal behaviour and Management. I belong to Japan Ethological Society. 180 members of this society joined to this conference. My presentation time was last day and last session. I was worry about the number of the listeners, however a lot of people came to my presentation as no vacant seats. I could not have enough time to answer and questions, so I have to train the presentation skill.</p>
6. Others	
I appreciated to Prof. Naruki Morimura and Mr. Yusuke Mori to gain my presentation chance.
