

Research Activity Report
Supported by “Leading Graduate Program in Primatology and Wildlife Science”
 (Please be sure to submit this report after the trip that supported by PWS.)

2019. October 26	
Affiliation/Position	Wildlife Research Center/M1
Name	Hiroto Yoshimura

1. Country/location of visit
Iriomote island, Okinawa
2. Research project
Iriomote field course
3. Date (departing from/returning to Japan)
October 16, 2019 to October 20, 2019
4. Main host researcher and affiliation
Iriomote Station of the Tropical Biosphere Research Center, University of Ryukyus
5. Progress and results of your research/activity (You can attach extra pages if needed)
Please insert one or more pictures (to be publicly released). Below each picture, please provide a brief description.
<p>In this course, we experienced kayaking, exploring limestone cave, trekking, snorkeling, and night walk. We could observe many species unique to tropical climate. Lecturers’ guide made this course more interesting.</p> <p>We also learned ecology and research method of Iriomote cat. It was great to learn about Iriomote cat from professor Izawa. Fortunately, we could find scat of the cat in the field. After that we analyzed camera trap images and visited conservation center.</p> <p>I want to visit Iriomote island again to meet many species we can’t see in this course.</p>
