

SUMMARY OF PREVIOUS SEMINAR

CICASP Seminar in Science Communication #134

Foundations of Primatology & Wildlife Science: Revisiting Classic Papers (Part 1)
5PM–, Wednesday, July 1, 2020

In our previous seminar, we explored groundbreaking studies in fundamental papers of our respective fields of studies in primatology and wildlife science. We divided into groups and discussed why we selected these papers, how they contributed to the foundation of our respective disciplines, and shared its significance to us with our colleagues at PRI and WRC

OUTLINE OF UPCOMING SEMINAR

CICASP Seminar in Science Communication #135

Foundations of Primatology & Wildlife Science: Revisiting Classic Papers (Part 2)
5PM–, Wednesday, July 8, 2020 (on Zoom; see email announcements for details)

Building on last week's seminar*, we will continue to explore the common 'ingredients' of foundational works of science. Selected participants from WRC and PRI will give mini-presentations (3–5 minutes) on the 'classic' papers of their choice to enlighten us all.

*Missed last week's seminar? No problem—we will be delighted to see you in the audience. Check out the list of 'classic' papers that we compiled last week (see email announcements for the link to a shared online folder), and if you want, add your selection to the list along with a short paragraph describing what makes it foundational.

Call for Practice Presenters!

If you are giving a presentation at an academic conference this summer and want to practice it, we may be able to offer you a spot during a CICASP seminar in July–August. Please let us know when and what you want to get our feedback on. You can reach the seminar organizers at: cicasp_seminar@mail2.adm.kyoto-u.ac.jp
